

SCARBORO KIA

HVAC Air Purification System

IMPROVE THE IN-CAR AIR QUALITY BY REMOVING ALLERGENS, MOLD & BACTERIA.

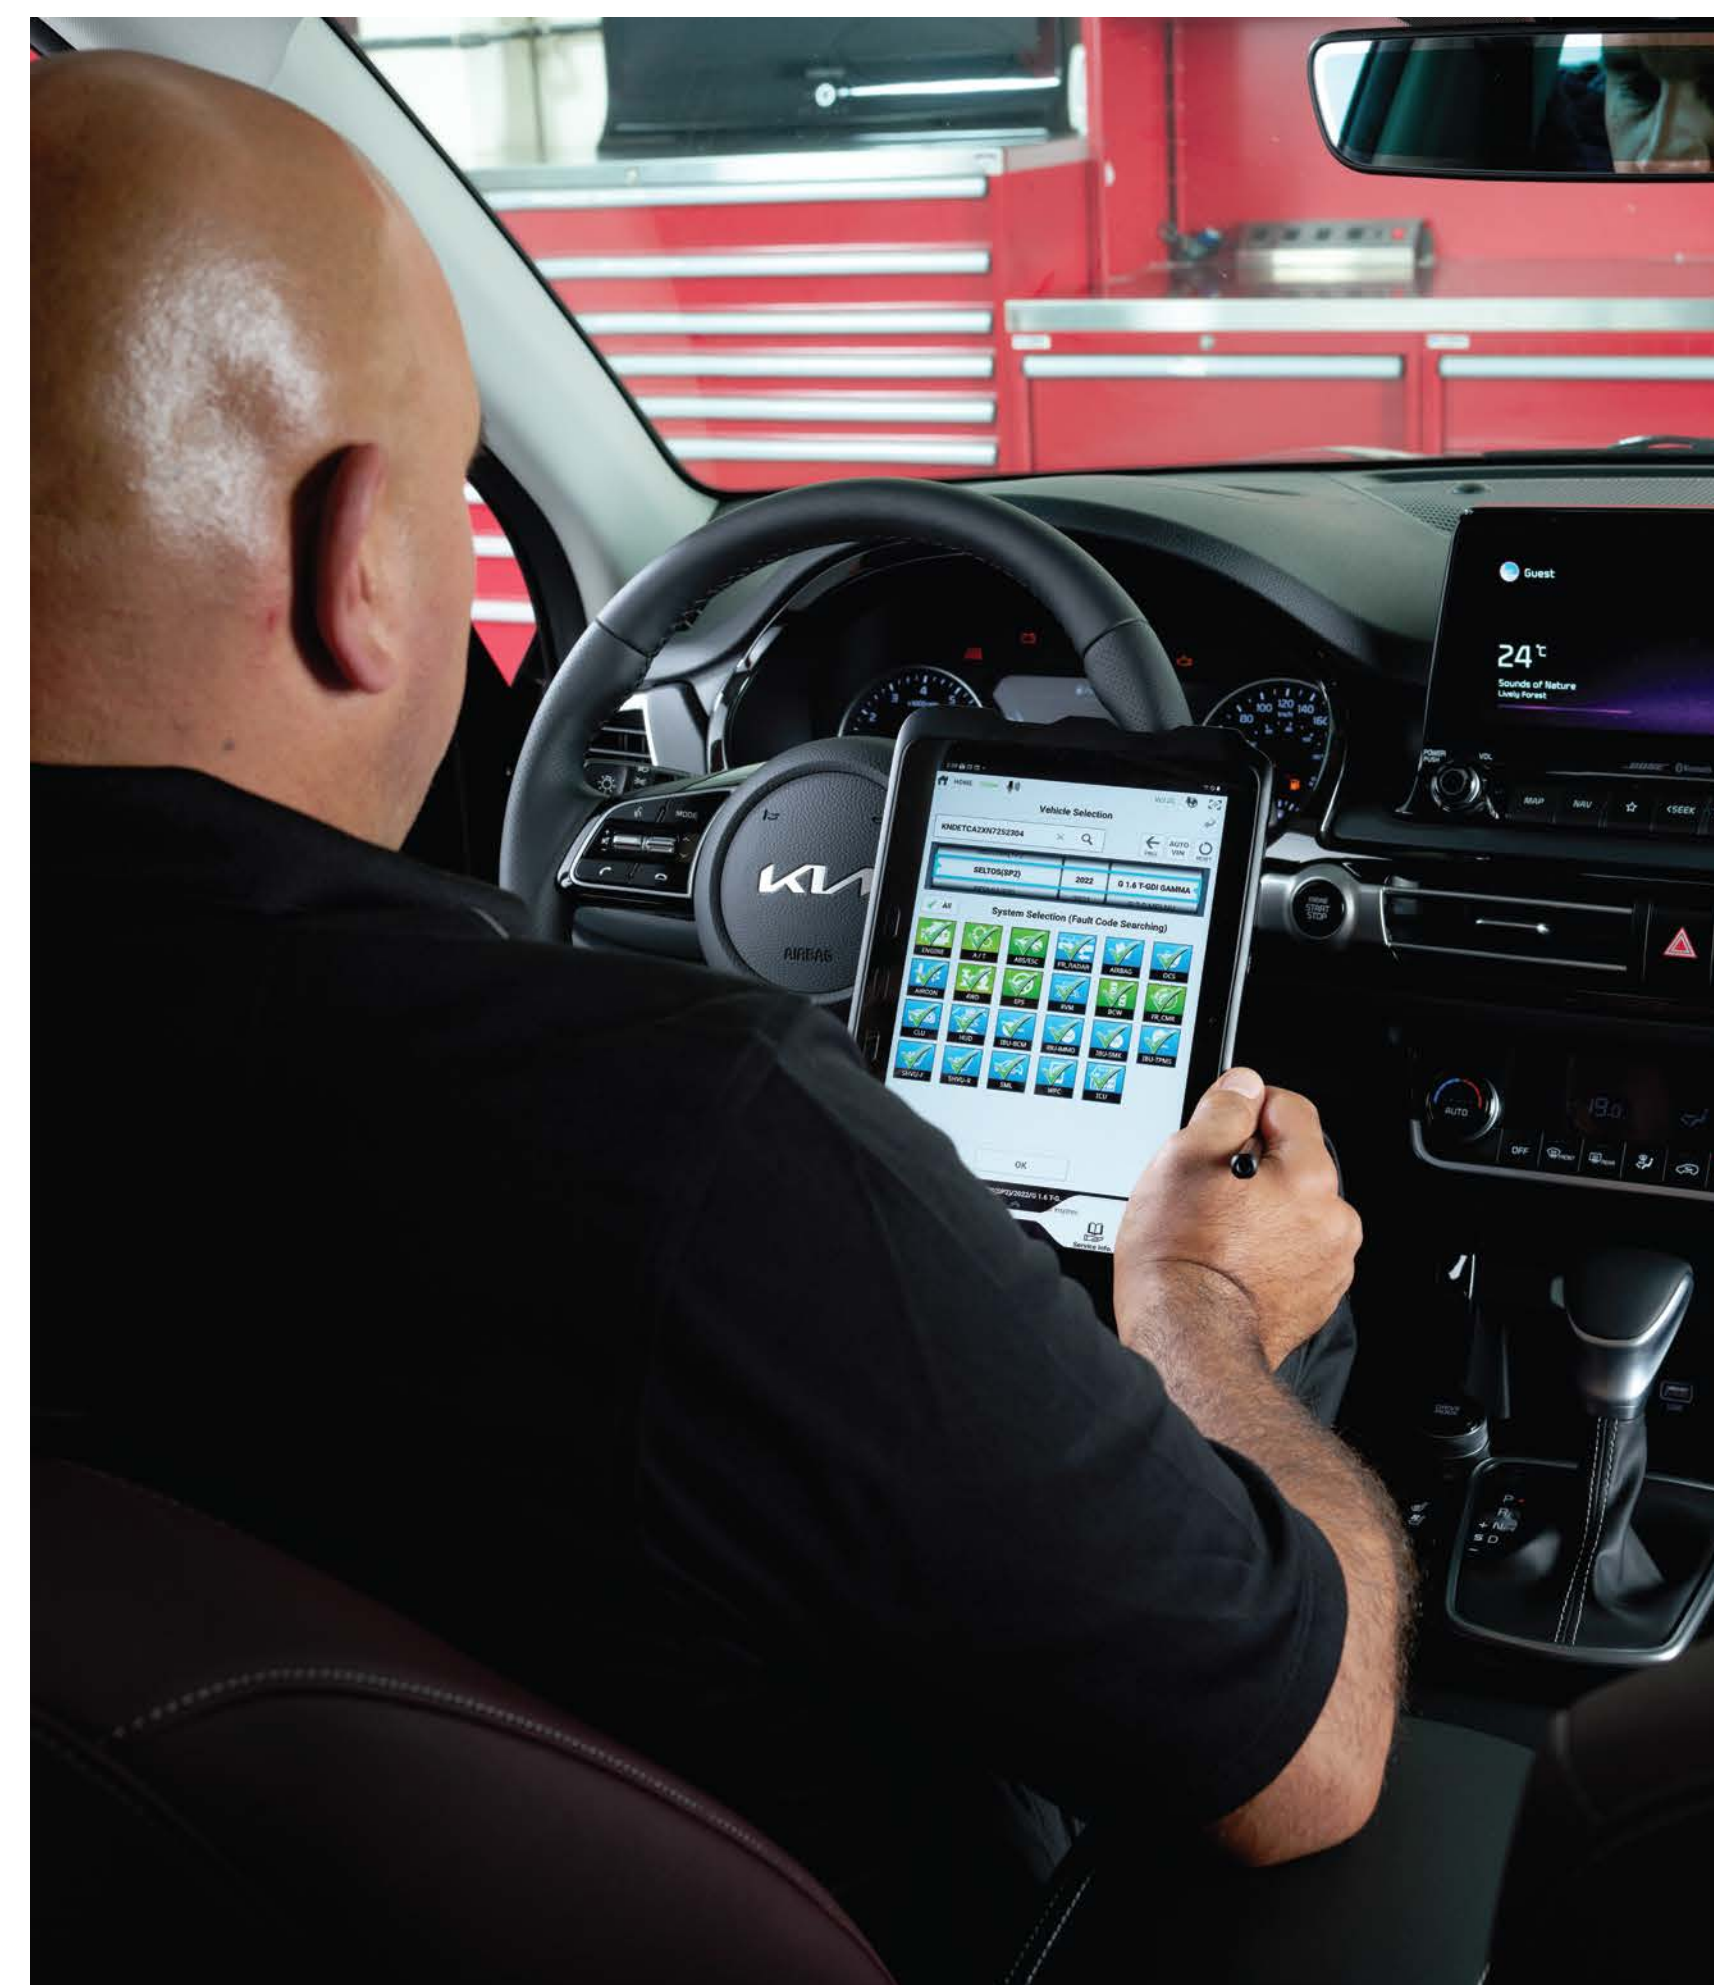

Over time, dirt & debris can accumulate in the HVAC cavity, blocking the drain. This results in the formation of bacteria, mold & mildew in the wet environment, creating unpleasant odours & a potential health hazard inside the vehicle.

Our Skilled Technicians Will:

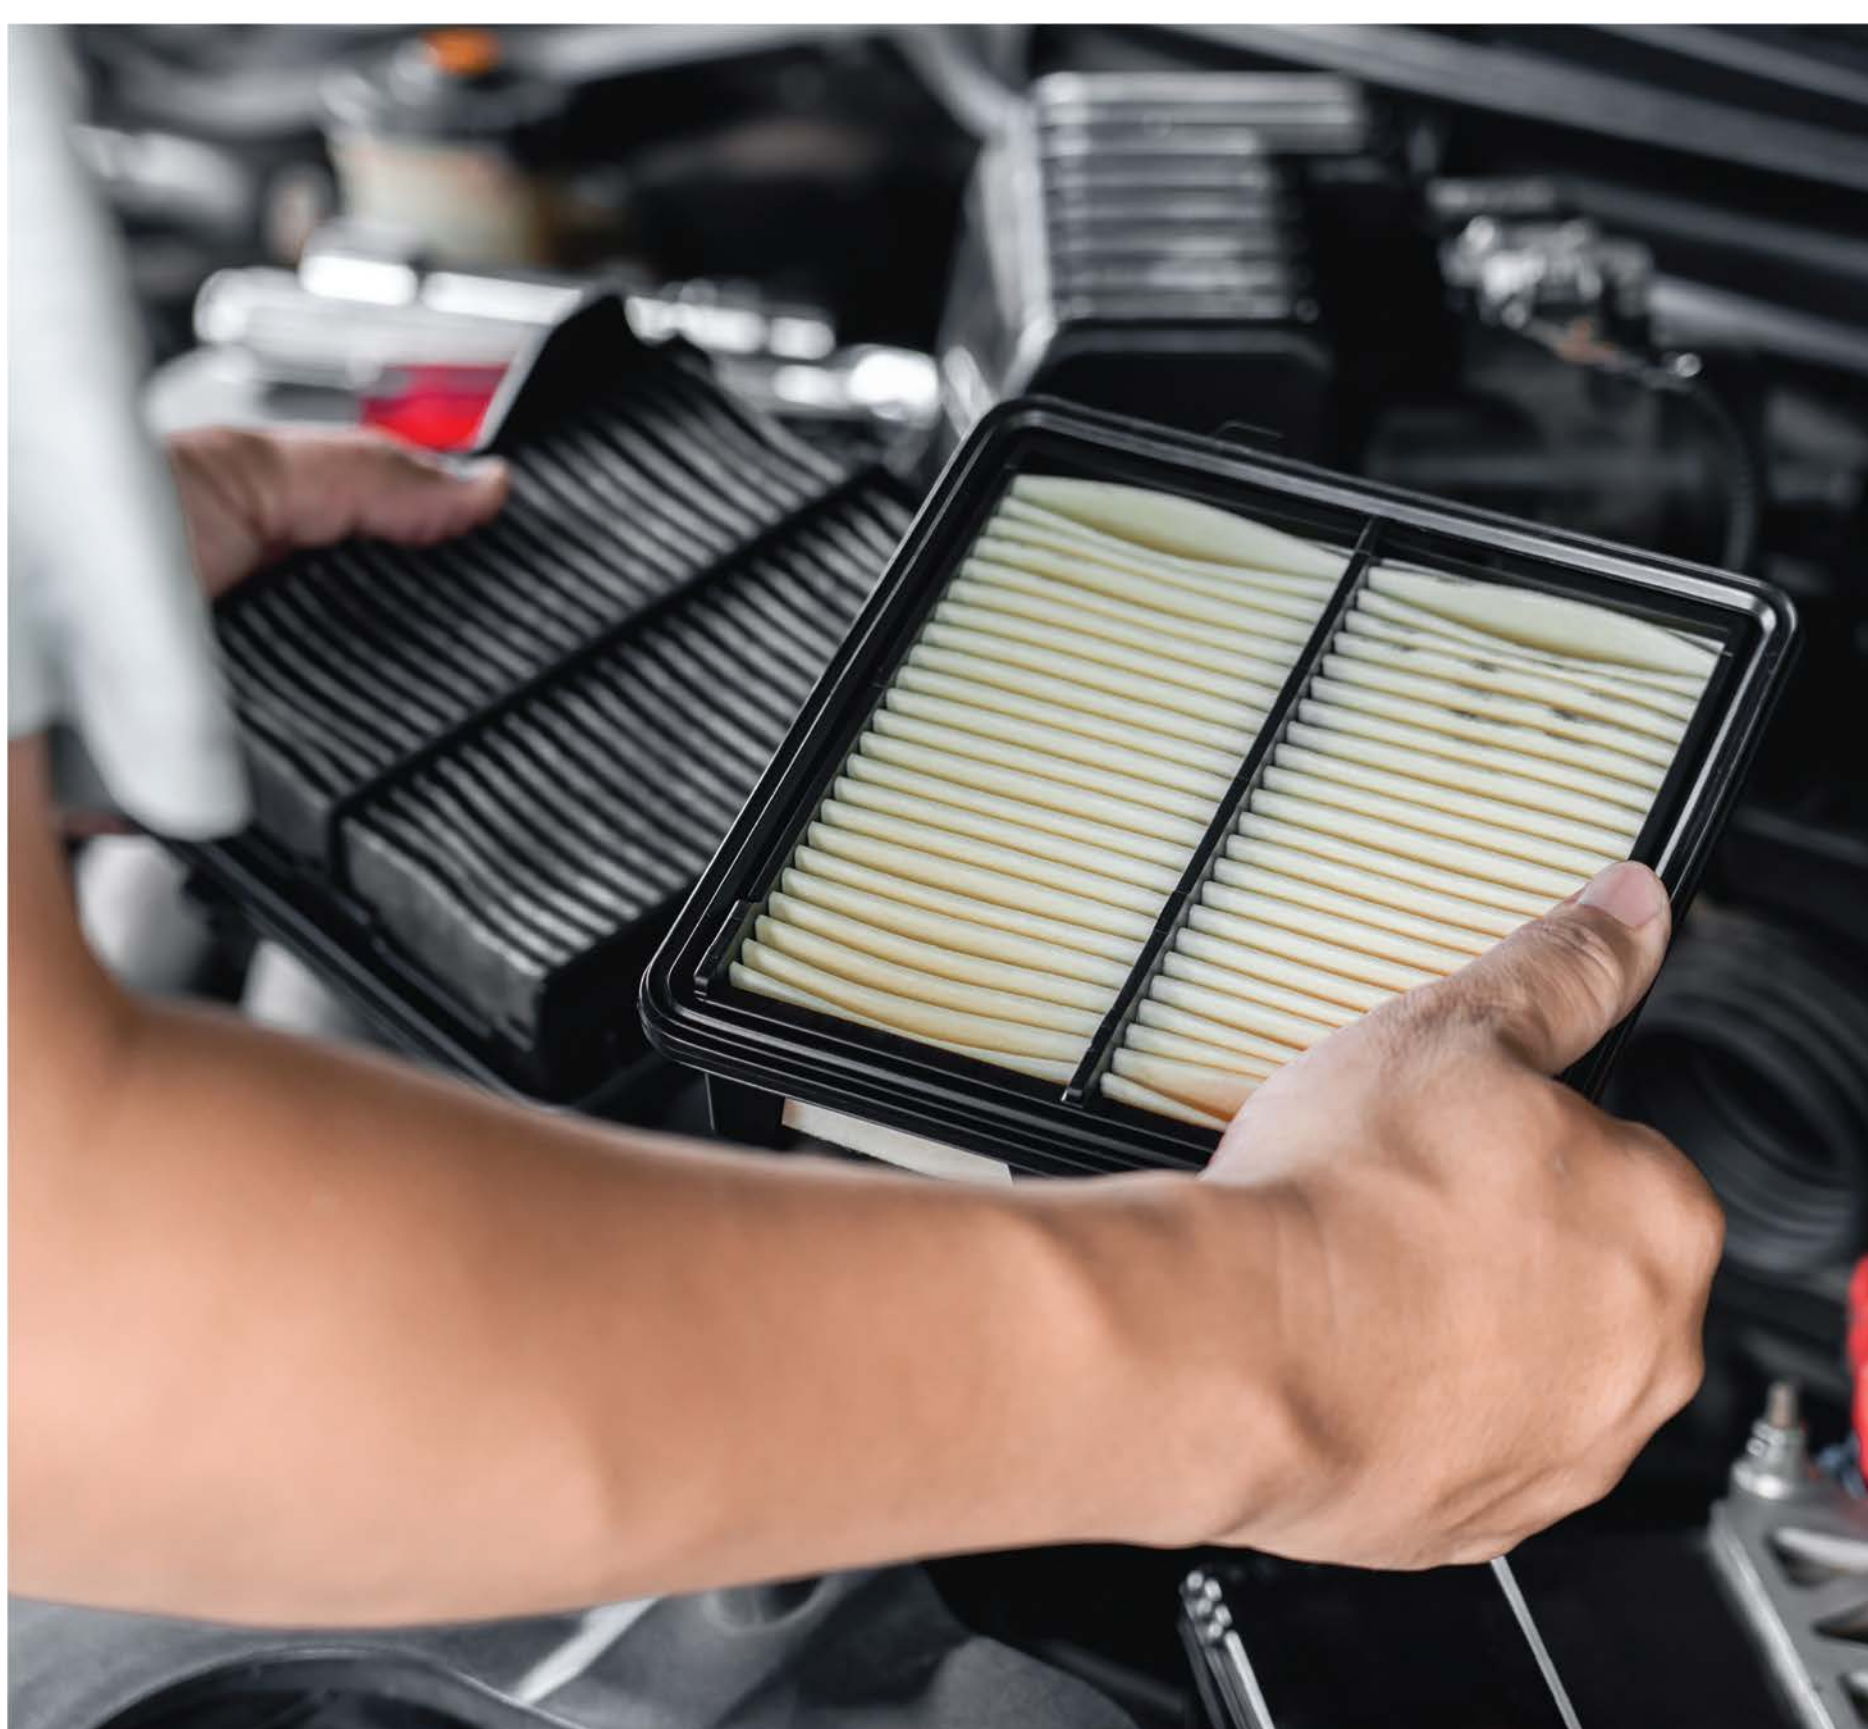

- Inject a foamy chemical cleaner into the evaporator cavity condensation drain hose to cleancut the HVAC system.

Our HVAC Air Purification System Will:

- Clean & refresh the evaporator coils & cavity.
- Remove dirt, debris & odour-causing contaminants.
- Ensure proper operation of the air conditioning system.

We Pay the HST If You Do Both Services Together!

Cabin Filter Replacement

REDUCES ODOURS & ALLERGENS FOR OPTIMUM AIR QUALITY.

The vehicle's filtration system filters outside air that enters the passenger compartment. This outside air contains millions of microscopic particles such as dust, pollen & spores. The cabin filter removes these airborne particles that are 3 microns larger in size.

Our Skilled Technicians Will:

- Replace the cabin filter with a new manufacturer approved filter.
- Clean box of dirt & debris.

Our Cabin Filter Replacement Will:

- Promote cleaner air in the vehicle's passenger compartment.
